1. Reconstruction of the northern wharf wall continues. Approximately 80 meters of the wall, starting at the new bridge, has been concreted. A further section of the old wharf wall, about 70 meters long, was taken down and the wall was being rebuilt. Progress was slow because of cold weather.
2. The new bridge at Greifswald runs in a north-south direction over the Ryck and forms a continuation of Steinbeckerstrasse. The bridge, built of reinforced concrete, is completed but not yet open to traffic. Approximately eight meters to the east of this bridge there is a temporary wooden bridge open to traffic.
3. Work on the launched lugger and on two other luggers not yet launched continued slowly at the VVB shipyard (formerly Buchholzwerft*).
